

BUNDU SHOWERS

**EMBRACE NATURE AND ENJOY A
WARM SHOWER IN THE BUSH.**

USER MANUAL

IMPORTANT NOTICE :

**LP GAS CAN BE DANGEROUS IF USED INCORRECTLY,
FOR OUTDOOR USE ONLY.**

IT IS ADVISED THAT THIS PRODUCT IS OPERATED BY ADULTS ONLY.

- **DO NOT** ignite the gas flame without the water flow functioning correctly, the HEAT EXCHANGER of this outdoor shower requires a CONSTANT FLOW OF COLD WATER IMMEDIATELY WHEN THE GAS BURNER IS IGNITED.
- Should you experience a water blockage, or no water flow, the GAS ADJUSTING VALVE SHOULD BE CLOSED IMMEDIATELY.
Check the water flow for problems, the water flow should first be restored before proceeding to make use of the Bundu Shower.
- NEVER STOP THE WATER FLOW BEFORE CLOSING THE GAS CONTROL TO EXTINGUISH THE FLAME.
Failure to observe this caution could result in damage to your Bundu Shower or personal injuries / burns, due to the steam pressure build-up.
- This hot water Bundu Shower requires a consistent supply of clean water flowing through the element, before being exposed to the flame of the gas burner.
- The water flow as well as the gas should be regulated to reach a suitable water temperature.

IMPORTANT NOTICE:

The manufacturer will not be held liable for any injury/s whatsoever sustained. The onus and decision to purchase and make use of this product, rests entirely with the owner or user. Please read the instructions on page 1 before making use of this product.
